ISCOMS is one of the world's leading student congresses in (bio)medical sciences. During ISCOMS, students are given the opportunity to present their own research in front of other students and professors from around the globe.

The 29th edition of ISCOMS will take place from the 8th until the 10th of June 2022 in Groningen, The Netherlands. Due to the COVID-19 pandemic, we were challenged to organise a digital edition of ISCOMS in 2020, as well as in 2021. Fortunately, this year we hope to host ISCOMS physically again together with several digital aspects, as we wish to make this year's congress even more successful.

The programme of the congress consists of presentations from students, keynote lectures, interactive workshops, a patient lecture and a surgical operation. The keynote lectures include Nobel Prize laureate prof. Bruce Beutler MD, as well as prof. Jeffrey Friedman MD PhD, prof. Karl Diesseroth MD PhD, prof. Roel Nusse PhD and prof. Hanneke Schuitemaker PhD. Furthermore, we host a social programme to give participants a chance to broaden their networks and to get to know each other.

If you are interested in presenting your research at ISCOMS 2022, please note that the abstract submission period of ISCOMS 2022 is open now until the 30th of January 2022.

Students can also visit ISCOMS as a non-presenting participant, which means you can attend the presentations of students and professors as well as the social programme.

Hope to see you at ISCOMS 2022!
